

**Badolo method for integrating climate risks into rural development plans**

M. BADOLO, [m\\_badolo@yahoo.fr](mailto:m_badolo@yahoo.fr); [cres@cres-edu.org](mailto:cres@cres-edu.org)

a1) Development plans for rural areas generally cover five years. Hz1 = year 1 of implementation of the rural development plan; Hz2 = year 2 of implementation of the rural development plan; Hz3 = year 3 of implementation of the rural development plan; Hz4 = year 4 of implementation of the rural development plan; Hz5 = year 5 of implementation of the rural development plan; a2) Badolo's tools for resilience are indicated here to establish families of information for the integration of climate risks in rural development plans; a3) The resilience triangle is a tool for dialogue and decision support for the resilience of rural development
